FOR IMMEDIATE RELEASE
9 A.M. EDT, April 30, 2019

CALDWELL TANKS, INC. RECEIVES ISO 9001:2015 CERTIFICATION

LOUISVILLE, KY April 30, 2019: As of April 2019, Caldwell Tanks, Inc. has been certified to the ISO 9001:2015 International Quality Standard. Caldwell's Quality Management System is applicable to the design, fabrication and construction of potable water and industrial tanks. The ISO 9001:2015 certification provides Caldwell's clients in the Water, Oil & Gas, Chemical, Power, and Aerospace industries throughout the United States and beyond with worldwide recognition that Caldwell's Quality Management System has been assessed and found to be in conformance with the stringent requirements of the referenced standards. While Caldwell has always been committed to quality, this certification ensures a high quality and productive environment, among many other benefits. The extensive audit was completed by Smithers Quality Assessments.

CUSTOMER SATISFACTION AND CONTINUAL IMPROVEMENT: Caldwell is committed to providing our customers with products that exceed the industry requirements in regard to specifications compliance, safety and quality of workmanship. Caldwell is also committed to sales, design, manufacturing, fabrication and construction of storage tanks that meet or exceed the customer's expectations and requirements for performance, cost and schedule. This is accomplished through a combination of dedicated employees, sufficient resources and the continual improvement of processes. Caldwell strives to be the leading company in its field and its community!

ABOUT CALDWELL TANKS, INC.: Headquartered in Louisville, KY, Caldwell Tanks, Inc. has been building innovative, customized water and industrial storage tanks throughout North America since 1887. Caldwell's broad capabilities allow for the turn-key design, fabrication and construction of customized field-erected storage tanks for Water, Oil & Gas, Chemical, Power and Aerospace industries.
